Thank You

- For the care you are providing every day
- For the hard work you are doing to improve your care systems every day
- For your commitment to health care reform, innovation and transformation

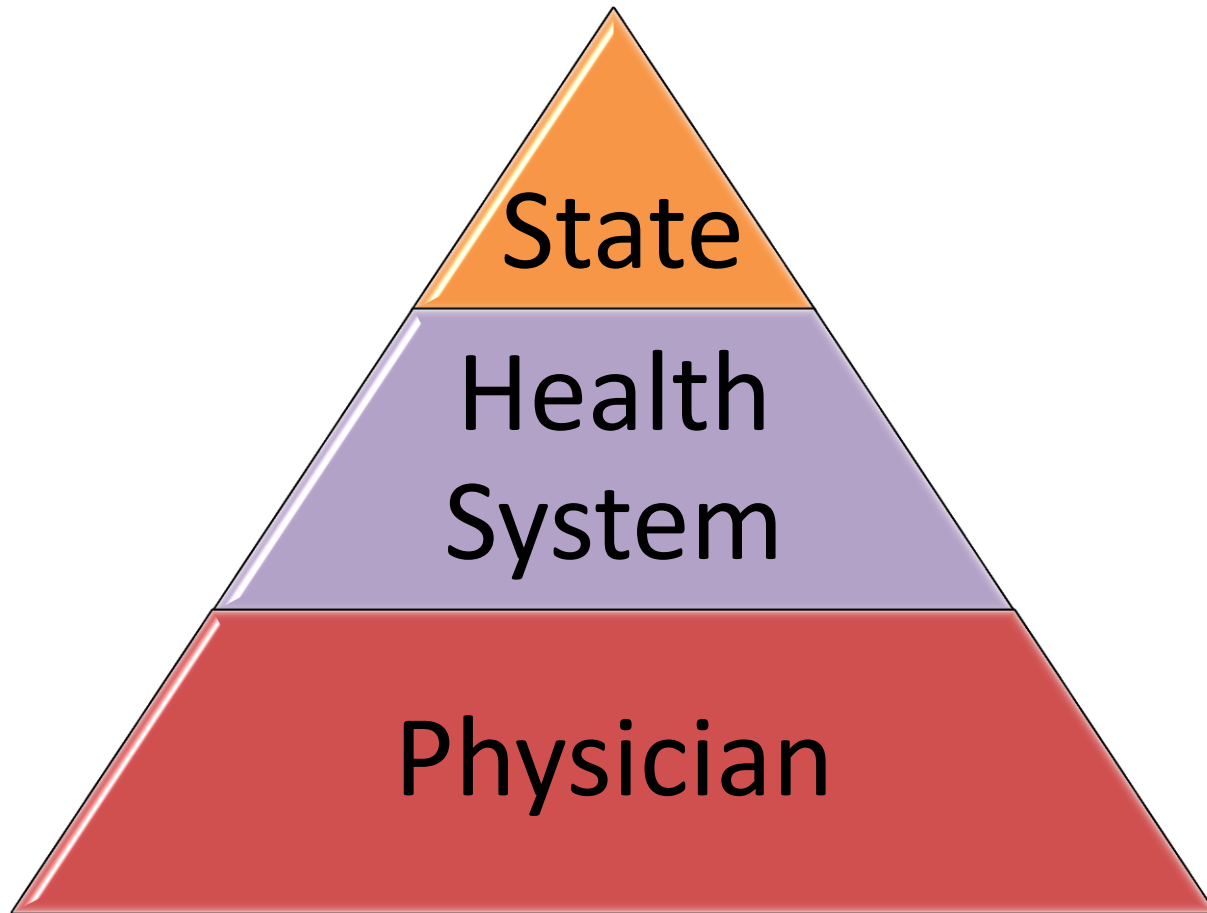

What is SIM?

- CMS is testing the ability of state governments to utilize policy and regulatory levers to accelerate health transformation to improve health, improve health care delivery and decrease cost.

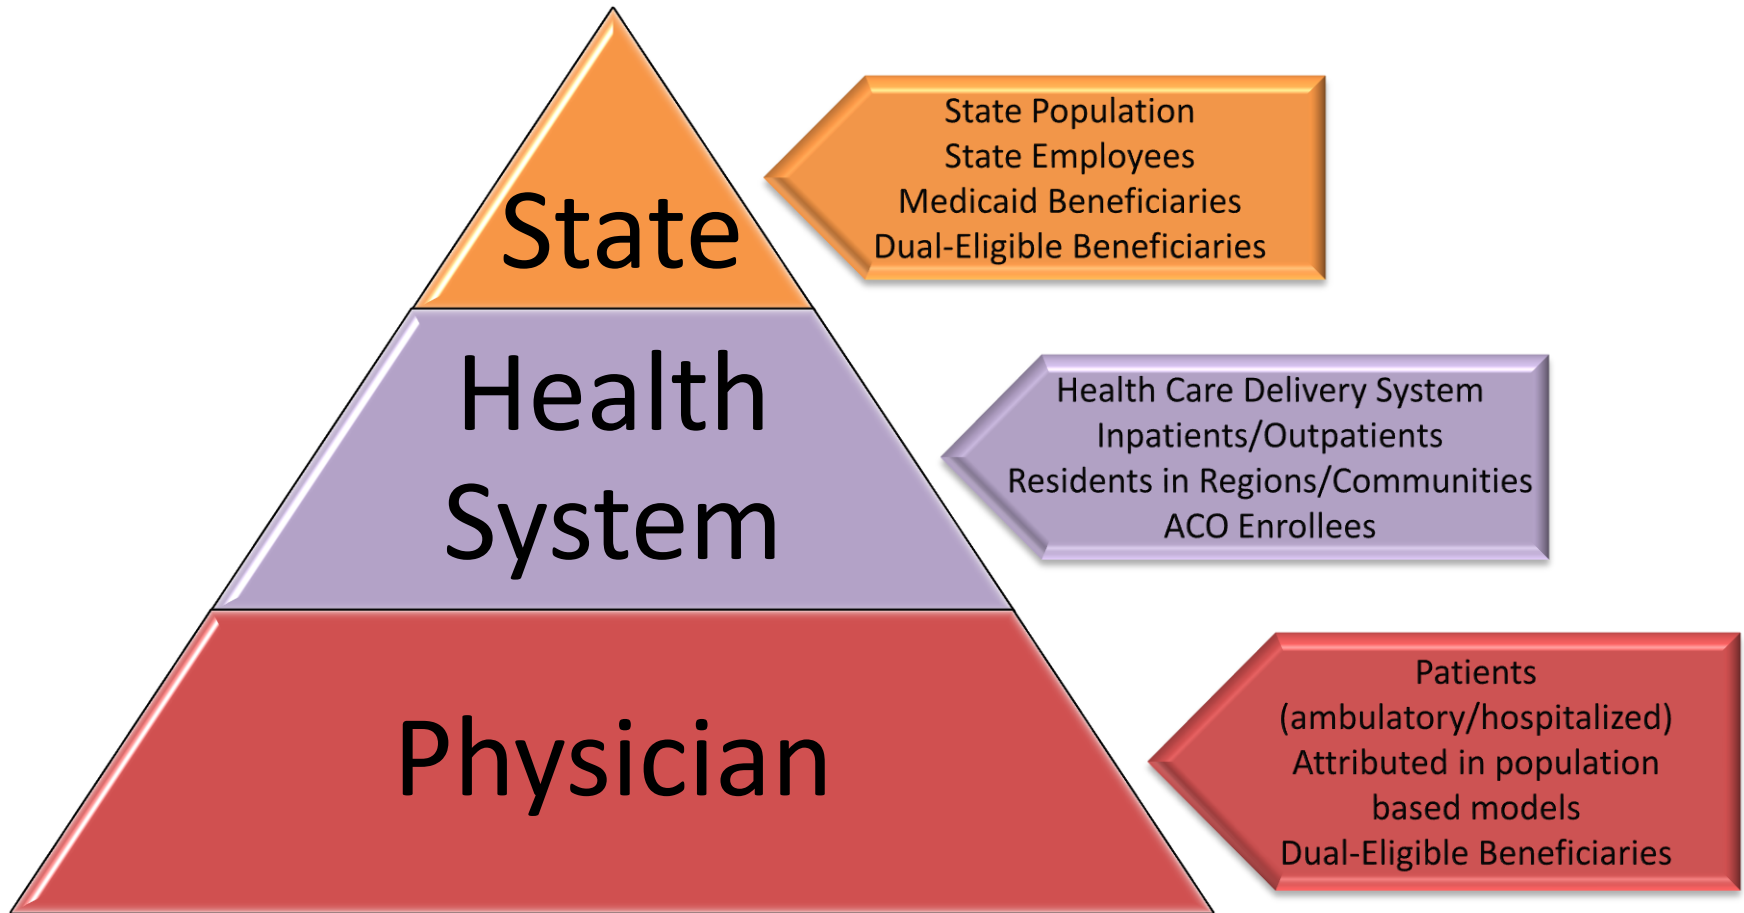

SIM Focus Areas

What is Population Health?

Improving the health of attributed/accountable populations

Collaboration to improve population health

Meeting Objectives

- Accelerate the work of federal and state policy makers, provider organizations and providers to develop strategies to integrate population health and health care delivery systems
